

# MAIN FACE

Mount Snow operates under special use permits from the US Forest Service and is an equal opportunity service provider.

Our back-to-base trail system makes it easy for skiers and riders of all ability levels to easily meet up at the end of an enjoyable day on the slopes. Most of Mount Snow's signature cruisers are here: Snowdance, Canyon, Exhibition, Ridge, and the 3.1 miles that make up the green beginner trail Long John. Learning areas are located at the Launch Pad with the Mount Snow Ski & Snowboard School's home in the Discovery Center and at Sundance Base area on weekends and holidays.

# SUNBROOK

True to its name, the Sunbrook face offers great scenic runs on Bluebird days. Lovers of un-groomed trails enjoy the two dippers. Meanwhile, bump skiers do laps on Beartrap all day with music pumped through loudspeakers on the chairlift towers.

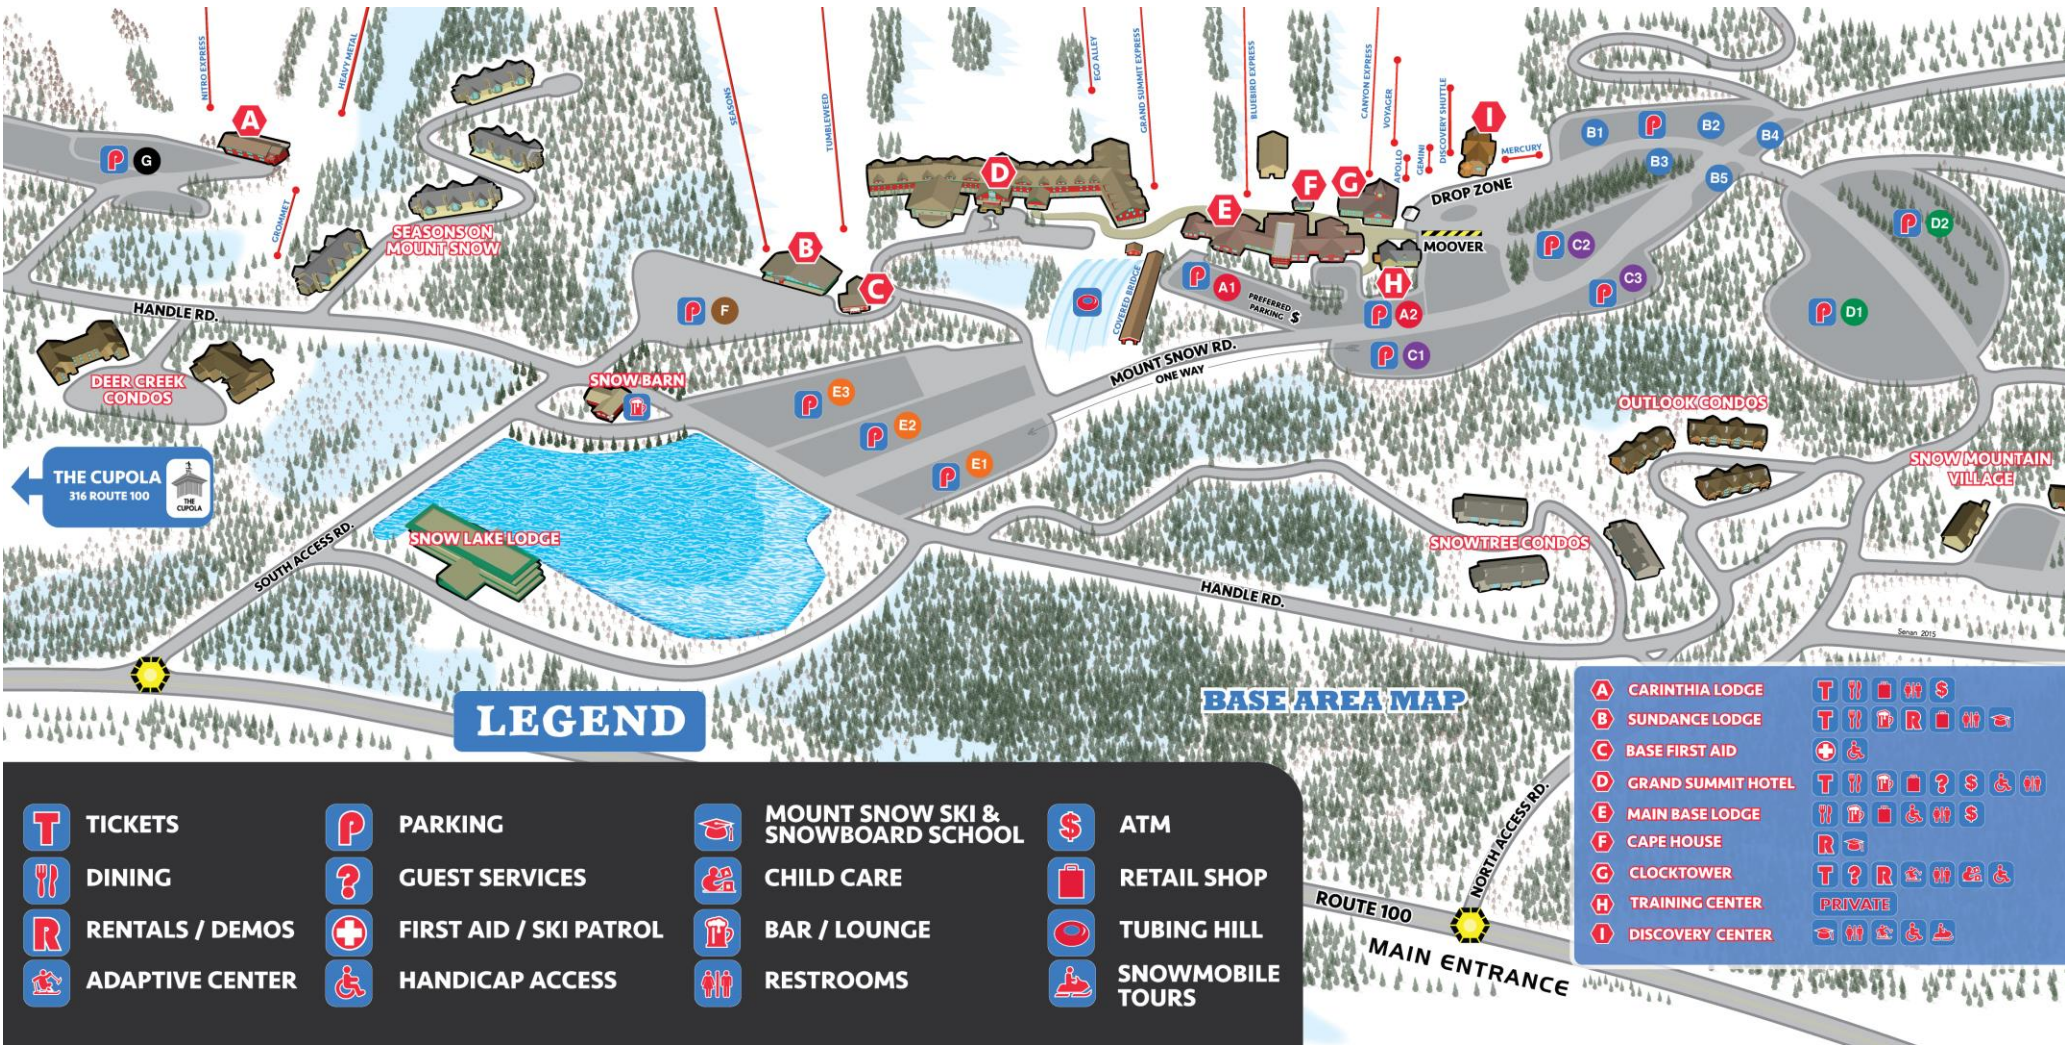

Ready for a real challenge? Spend some time on the steep slopes of the North Face. Many trails here are kept ungroomed for advanced skiers and riders, including Ripcord a double-diamond trail offering some of the steepest terrain in the Northeast. Tree skiers love the glades over here as well.

# CARINTHIA

Carinthia boasts 100 acres of parks loaded with rails, jumps, creative lines, tree-skiing zone, and Mount Snow's monster superpipe. There's no place like Carinthia for pure variety of snowboarding terrain and features. Carinthia's parks are the perfect destination for all abilities from the little groms to the top pros.

# BASE AREA

## LEGEND
